SYHUNT BREACH

The Syhunt Breach solution maps and displays details about data leaks on the **Surface**, **Deep** and **Dark** layers of the web that affect your organization, including file and credential exposures, and allows you to perform scored analysis of breaches, forensic analysis of logs and breach prevention. Covering domains from all over the globe, Syhunt Breach is powered by a database generated by the Presta AI combined with our human intelligence.

BREACH HUNTING

- Performs a check powered by a regularly updated databases that covers various types of data leaks and breaches, including:

- From surface to dark web: **file exposures**, **password** leaks and past security incidents.

- Leaks related to over **58 million** domains globally, including those related to ransomware attacks (amounting to over 150 terabytes).

- Over **5 billion** leaked passwords.

- Comes with user and command-line interface, as well as **integrations** (Jenkins, JIRA, Powershell, and more).

- Works on-premise (offline or hybrid mode). The online mode auto-downloads encrypted domain breach information from cloud-based servers, while the offline mode allows to obtain an encrypted file copy of the breaches through a secure channel.

- Licensed **per domain** with bulk discount available - you or your organization must own the domain to obtain full access to details about any identified leaks associated with it.

- Supports domains from **North America, South America, Europe, Africa, Asia** and **Oceania**, and **international** domains.

- Includes 1 seat and 1 year of technical support, upgrades and breach intelligence.

REPORT WITH BREACH SCORE

- Generates comprehensive PDF and HTML reports containing all the details about the identified data leaks, charts, statistics, comparisons and references

- Includes **Breach Score**, a score based on identified leaks and incidents related to your Internet domains.

- Allows multi-domain score comparison, taking into account records from the last 5 to 15 years.

BREACH PREVENTION & MORE

- Having an active Syhunt Breach license gives your organization access to the following additional tools and services:

- **Breach Hardening**: yearly access to breach prevention tool Syhunt Dynamic. Available at no additional cost.

- **Syhunt Forensic**: exposes the source, the type and the methods used to compromise web apps through logs.

- **Takedown** of online content that infringes your copyright can be activated through the Syhunt Takedown Service at a 30 percent discounted price. Only charged after a successful takedown.
