SYHUNT
HYBRID INFINITY

The Syhunt Hybrid Infinity Edition has been designed for larger enterprises and consultant firms with wider target needs and recurring vulnerability assessment projects and allows to perform **DAST**, **SAST** and **MAST** tasks against an **unlimited** number of targets and all kinds of supported environments and programming languages. The Infinity Edition can be combined with Syhunt's AVA Project Support service whenever needed, allowing you to get dedicated expert assistance for your AVA (Application Vulnerability Assessment) projects.

IDEAL FOR LARGER ENTERPRISES & CONSULTANT FIRMS

- Allows to scan **unlimited** URLs and source code files of your apps (or your customer apps if you're a consultant).
- Scans can be performed an **unlimited** number of times during the license period.
- Supports SAST, DAST, OAST and MAST methodologies.
- Includes 1 seat and 1 year of technical support, upgrades and vulnerability updates.
- Includes surface-to-dark web monitoring that detects leaks related to your company's Internet domain (a single domain included).
- Includes coverage for **all** the scripting languages supported by Syhunt, including: **Mobile:** Java, Swift, Objective-C, C & C++. **Web:** PHP, classic ASP, ASP.NET, Java/JSP, Node.js, Lua, Perl, Python and Ruby
- Includes the Basic Consultant Permit for an **unlimited** number of projects during the license period.
- Expert project support can be activated for 15 days through the Syhunt AVA Project Support service at a budget friendly price (see more info on right side).

AVA EXPERT PROJECT SUPPORT

- Available for a punctual corporate or consultant application vulnerability assessment project at a budget friendly price.
- Hold kick-off meeting to share your project details and specifications, and set the service schedule and scope.
- Optimization of Syhunt for scanning list of key, in-scope targets, and accelerated product customization to meet project needs.
- Dedicated expert assistance to accelerate review and understanding of scan reports.
- Optional discreet presence of a Syhunt expert or key representative person during key virtual meetings.
- Usually takes place over a **15-day** time frame.
- Assistance during re-testing (if required) takes place over a **7-day** time frame.
- The above time frames and license period can be extended if required at a budget friendly price.
